ACADEMIC SENATE
of
CALIFORNIA POLYTECHNIC STATE UNIVERSITY, SAN LUIS OBISPO

RESOLUTION ON STRATEGIC PLANNING PROGRAM

Background information: California is undergoing several demographic changes which may have a significant impact on Cal Poly. First, the number of high school graduates in the state is expected to decline by nearly 10% from 1982 to 1992. Second, the ethnic mix of these graduates will be shifting from whites to Hispanics. Within this environment, federal financial support for students is being sharply reduced. This suggests that over the next decade, competition for qualified students is likely to increase substantially.

Given these significant, though not earthshaking, changes, the Long Range Planning Committee identified a number of issues which it felt must be considered if Cal Poly is to maintain and enhance its present position.

List of issues facing Cal Poly:

Enrollment

Admissions standards and criteria
School enrollment quotas
Problems with "No Shows" and persistence to graduation
Affirmative Action

Curriculum

Specialization of curricula
The role of general education
Adapting to changing market conditions
Use of new educational technologies
The role of external accrediting agencies
Role of unique experiences such as internships, CO-OP, and Junior Year Abroad

Faculty

Attracting and retaining qualified faculty
Attracting minority faculty
Collegiality between faculty receiving various wage supplements and those who are not

Land and Facilities

Adequate library, office, and laboratory spaces
Providing adequate equipment in laboratories
Telecommunication facilities for linking campus and external users
Competition for use of campus land among parking, building, agricultural activities and scientific observation
Housing for students and faculty

WHEREAS, There are a number of important issues facing Cal Poly;
and

WHEREAS, The President has established goals and principles to
guide the University; and

WHEREAS, Competition for qualified students is likely to increase;
and

WHEREAS, A number of firms and institutions have found strategic
planning to be a useful management tool; therefore be it

RESOLVED: That the Academic Senate urge the President to undertake
a strategic planning program to develop a coordinated
response to these issues; and be it further

RESOLVED: That such a program should provide a mechanism to involve
the Academic Senate and appropriate faculty, staff, and
student groups.

Memorandum

To : Reg Gooden, Chair
Academic Senate

Date : March 18, 1985

File No.:

Copies: Instruction Committee

From : Kathy Ryan, Chair 
Instruction Committee

Subject: PROPOSED ACADEMIC CALENDAR, 1986-88

The Instruction Committee has met and reviewed the proposed Academic Calendar for 1986-88. We feel that efforts should be made to reduce the impact on instruction when quarters occur in which two or more Monday holidays significantly decrease instruction time. A Monday night class or lab, for example, which meets only once a week, will lose 20% of class time in Winter, 1987 and 1988. This is a significant loss to the student, particularly when fees paid by the student are not adjusted to compensate for lost instruction time.

Spring Quarters which have one Monday holiday lose up to 10% of instruction time. The Instruction Committee feels this may be acceptable if the instruction compensates by assigning extra outside assignments, and the class schedule is constructed so the burden of lost instruction is not always carried by the same course, year after year.

To ease the burden of two Monday holidays occurring Winter Quarter, 1987 and 1988, we recommend the following:

1. The Scheduling Office should notify departments, perhaps when Phase I, Winter Quarter, material is sent to departments, of the two Monday holidays during Winter Quarter, effectively limiting the number of Mondays to eight (8), and advise them to seriously consider:
 - a. moving courses which are routinely scheduled on Mondays in Winter to another day; or
 - b. alternate Winter Quarter courses with Fall or Spring courses so as to allow other courses to carry the burden occasionally.
2. Construct the Academic Calendar in such a way that one Saturday during Winter Quarter, 1987 and 1988, becomes a class day on a universitywide basis. This can be accomplished several ways:

- a. During the week of January 19, 1987, Monday, January 19 is a holiday (MLK's birthday). Use the following Saturday, January 24, as the lost Monday, so that classes scheduled to meet on the lost Monday would now meet on Saturday, January 24. A drawback to this is that Monday night classes would then meet on Saturday night.
- b. During the week of January 19, shift the normal week days, Monday through Friday, over one day so that Monday's classes would meet on Tuesday, Tuesday's classes would meet on Wednesday, Wednesday's classes would meet on Thursday, Thursday's classes would meet on Friday, and Friday's classes would meet on Saturday. This would affect fewer students since there are fewer classes that would shift to Saturday, and few, if any, Friday night classes would have to shift to Saturday night.

Utilizing Saturday as a class day would only occur during those quarters which have two (2) Monday holidays.

**SUMMARY OF CLASS DAYS PER QUARTER
MONDAY THROUGH FRIDAY**

	<u>SU 86</u>	<u>F 86</u>	<u>W 87</u>	<u>SP 87</u>	<u>SU 87</u>	<u>F 87</u>	<u>W 88</u>	<u>SP 88</u>	<u>SU 88</u>
MONDAYS	10	11	8	9	10	11	8	9	9
TUESDAYS	9	10	10	10	10	11	10	10	10
WEDNESDAYS	10	10	10	10	10	9	10	10	10
THURSDAYS	10	10	10	10	10	10	10	10	10
FRIDAYS	9	10	10	10	10	10	10	10	10
TOTAL CLASS DAYS	48	51	48	49	50	51	48	49	49

The discrepancy between the number of like class days of the week from quarter to quarter should be considered when the schedule of classes is being planned.

Scheduling of classes that meet only one day per week on a class day that falls less frequently than the average should be avoided. If scheduling on these class days is necessary and the deficiency must be made up, an additional one or two time only class meeting can be scheduled for a Saturday by means of a footnote entry in the Class Schedule.

Memorandum

From : Malcolm W. Wilson, Vice Provost

Subject : PROPOSED ACADEMIC CALENDAR, 1986-88

The attached proposed Academic Calendars covering the University years 1986-88 are being forwarded to you for consultation with your constituents. Any proposed modifications or recommendations should be conveyed directly to Don Coats who is responsible for developing the proposed Calendar for eventual submission to the President for approval.

Because of our deadlines, we need your response on or before April 26, 1985.

Subject: PROPOSED ACADEMIC CALENDAR 1986-88

Attached are proposed Academic Calendars covering the University years, 1986-87, 1987-88, and the 1988 Summer Quarter (tentative). Presently the University is operating on an Academic Calendar with dates approved through Spring Quarter 1986. We have already received inquiries concerning dates beyond the present calendar and in view of catalog deadlines, the proposed calendar should be reviewed by the various consultative groups so their reaction and/or recommendations can be submitted prior to May 1, 1985.

The proposed calendars follow the Academic Calendar Norms adopted by the Chancellor's Council of Presidents in 1976. The norms specify that an academic year shall consist of 147 instructional days with a plus or minus two days permissible and a minimum of 170 academic workdays in an academic year (the academic year being defined as Fall, Winter, Spring Quarters). Our own campus Academic Calendar policy is included in CAM, Section 481.

When reviewing the attached calendars, attention is directed to the following exceptions from our campus calendar policy:

I. Academic Calendar 1986-87

- A. Summer Quarter begins on a Wednesday and the final examination period includes only four days. This anomaly was created because of the late ending of the Spring Quarter and the custom to complete Summer Quarter prior to Labor Day. Between commencement on Saturday, June 14 and the first day of classes, Wednesday, June 18, there is a three day academic holiday. The tradeoff to the three day holiday between Spring Quarter and Summer Quarter would be to extend Summer Quarter a full week beyond Labor Day. The four-day, final examination period proposed for Summer Quarter can easily be accommodated as it was standard for the University prior to Summer Quarter 1981.
- B. We have included a mid-year commencement day in Fall Quarter 1986. As yet we are not committed to hold a mid-year commencement but there should be a decision announced prior to the approval date of the calendar. If it is decided not to hold a mid-year commencement, the reference can be deleted prior to calendar publication.

- C. Except for the items noted above, all other aspects of Fall Quarter fit within the Chancellor's Council of Presidents Norms and the CAM regulations on Academic Calendars. We have included with the proposed calendar, information on the number of times for each day of the week classes are scheduled to meet each quarter. This may serve to alert those individuals who believe the number of Monday academic holidays is a problem, especially for classes meeting on Mondays only, and they can react accordingly when building their schedule of classes.

II. Academic Calendar 1987-88

- A. Because Independence Day is on Saturday, there is no designated Fourth of July holiday. As noted in the previous year's calendar, a mid-year commencement date is included, which can be deleted if necessary.
- B. The 1987-88 calendar fits within norms established by the Chancellor's Council of Presidents and the policy established by CAM.

III. Academic Calendar, Summer Quarter 1988

- A. This calendar is included as it resolves a number of questions that usually occur at the end of an approved calendar cycle. In all respects, this calendar is in compliance with University policy and guidelines affecting the Academic Calendar.

No mention is made of add/drop or late registration on the proposed Academic Calendars. These dates have been intentionally omitted because of ongoing discussions concerning add/drop. It is expected that a policy resolution will be arrived at before the calendar is approved and at that time, we will include the add/drop and late registration deadlines. In the meantime, we have included the first, second and third week dates as benchmarks.

As specified by CAM 481, the proposed calendar should be reviewed by the various campus consultative groups such as the School Councils, Academic Senate, and Student Senate. These consultative groups should report back with their comments on the proposed calendar. The information obtained from consultation will be used to finalize the calendar which will be submitted to the President for approval. Any unresolved differences will be pointed out as a part of the material submitted to the President.

Attached to the proposed calendars are copies of the worksheets and a calendar for each year. This information should make it easier for those reviewing the calendar and enable them to react within the necessary deadline.
